

Feature Request 1: Restart Game

Description:

- This allows players to restart the game at any point during gameplay, upon mutual agreement. This feature is perfect for when players want to start from scratch or need to rethink their strategies.

Expected Impact:

- The 'Restart Game' feature enhances the flexibility of gameplay. It provides an opportunity for a fresh start whenever players feel the need, which can be particularly useful in learning new strategies or correcting mistakes without the pressure of losing ranks, and time. But in a ranked game each player can request for a restart game only once in the entire game, this will ensure there are no unnecessary restart calls.

Implementation/Suggestions:

- Display a "Restart Game" button within the game's interface, which is accessible during gameplay.
- When a user presses restart, alert the player and ask for confirmation, yes/no.
- After the player confirms, the opponent will get the alert and have a chance to accept/reject
- Once a user uses their restart attempt, the restart button will be locked.
- If the other player agrees for the restart, new board will be created, and game will start from the beginning.

Feature Request 2: Bonus Difficulty with Time Challenge

Description of the Feature:

- A timed challenge mode where each player starts with 20 seconds per move. The time for each subsequent move decreases by 1 second, with a floor of 5 seconds. This mode is designed to challenge the player's quick thinking and decision-making under time pressure.

Expected Impact:

- The 'Bonus Difficulty with Time Challenge' adds an exciting rush to the gameplay, appealing to those who enjoy fast-paced, high-pressure situations. It increases the game's difficulty and tests players' abilities beyond basic strategy, making every second count.

Implementation/Suggestions:

- A countdown timer that is visible during each player's turn.
- The timer should start at 20 seconds and decrement by 1 second after each move, never falling below 5 seconds to maintain gameplay fairness.
- Ensure the timer is clearly displayed and easily noticeable, updating in real-time to keep players informed of the remaining time to make their move.
