

Grade Letter Proposal for Team Kilo

Grade Proposed: **B**

The team demonstrated strong efforts in design and documentation, providing well-structured and detailed explanations. However, there were gaps in planning that impacted the overall assessment, some sections could have benefited from additional clarifications, such as AI integration for solo play, they did not specify what kind of AI will be used, how it would work, what techniques would be used, or how AI difficulty would scale based on rank.

On the planning side, the team had realistic goals and timelines, which was great. However, the planning document lacked sufficient details about timeline which made it difficult to determine if deadlines were being met.

Overall, they receive “B” because the team has built a solid base, but some areas need refinement to ensure a smoother implementation. The project demonstrates strong potential, but addressing the identified gaps will significantly enhance its overall quality.
