

Grade Letter Proposal for Team November

Grade Proposed: **B+**

The team put in a lot of effort and demonstrated a strong understanding of the platform's goals. The diagrams and documentations were detailed and on the right track. However, some areas could be improved to be on a better side, such as simplifying diagrams by eliminating unnecessary parts.

The planning document was well-structured and clearly defined responsibilities. The timeline also provided a clear development path. Dependencies between different teams were recognized, but some areas lacked detailed explanations, such as contingency plans for potential delays.

Overall, they receive a "B+" since there is undoubtedly a solid foundation in place, but additional cleanup and improved flow are still needed. The group has shown great promise, and resolving these problems will greatly improve the project's overall calibre.
